

# IT'S 2012!

**H**ave and enjoy twelve months of energy safety.

**A**lways resolve to use energy safely.

**V**ery few resolutions are as simple but as important to make and keep.

**E**verybody will benefit.

**A**nyone, no matter their age, can help with an energy safety resolution.

## SAFE AND

**H**ow To Use instructions are important to follow with any electric or gas appliance.

**A**lways call 811 (AZ Blue Stake) at least two business days before digging.

**P**eriodically have all appliances, appliance connectors, and customer-owned piping inspected.

**P**roperly and adequately ventilate all gas appliances.

**Y**ou need to be aware of pipelines in your community even if you don't have gas appliances.

**N**ever overload electric outlets or extension cords.

**E**veryone should learn the smell (rotten eggs), sight, or sound (hissing) of a possible gas leak.

**W**hen installing appliances, make sure they are installed by qualified and licensed technicians.

**Y**ou and everyone in your household should know the signs of carbon monoxide poisoning.

**E**veryone in your household should know what to do if there is an electric or gas emergency.

**A**ll smoke detectors should be checked monthly and batteries should be replaced if necessary.

**R**emember that energy safety is everyone's responsibility!
